Why Choose sTrades Ultimate Gold EA?

sTrades Ultimate is a **complete trading ecosystem** powered by collective artificial intelligence. Imagine 100 traders connected to a single intelligent brain - each one benefits from the combined learning of all others.

No emotions. No FOMO. No revenge trading. The AI makes decisions based purely on data and probabilities. It doesn't panic during drawdowns, doesn't get greedy after wins, and never chases the market. Pure, disciplined, algorithmic trading.

Perfect for personal accounts and **Prop Firm challenges** alike - the strict risk management ensures consistent performance while protecting your capital.

COLLECTIVE AI BRAIN

Learns from ALL connected users. 100 accounts = 100x learning data = smarter decisions. No emotions, pure data-driven trading.

MULTI-TIMEFRAME MASTERY

Analyzes 6 timeframes (M1-H4) simultaneously. Higher TFs set trend, lower TFs find perfect entries.

REAL-TIME CLOUD SYNC

Always connected to cloud. Receive AI updates, sync settings remotely from any device, 24/7.

TELEGRAM SIGNALS

AI broadcasts signals to Telegram with Entry Zone, SL, TP - perfect for manual trading too.

REMOTE CONTROL

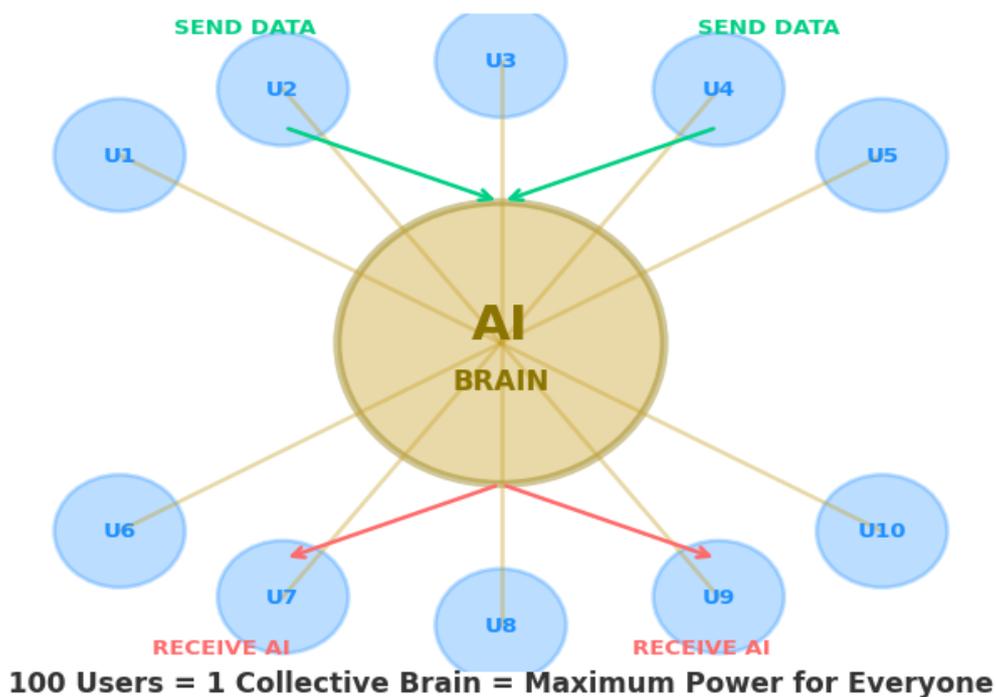

Close positions, disable trading, change settings from your phone. Full control without MT5.

EMOTION-FREE TRADING

AI immune to fear, greed, FOMO. Executes with 100% discipline, every time.

The Power of Collective Intelligence

Traditional EAs learn only from your trades. sTrades operates like a **neural network of traders**, where every connected account contributes to the collective brain.

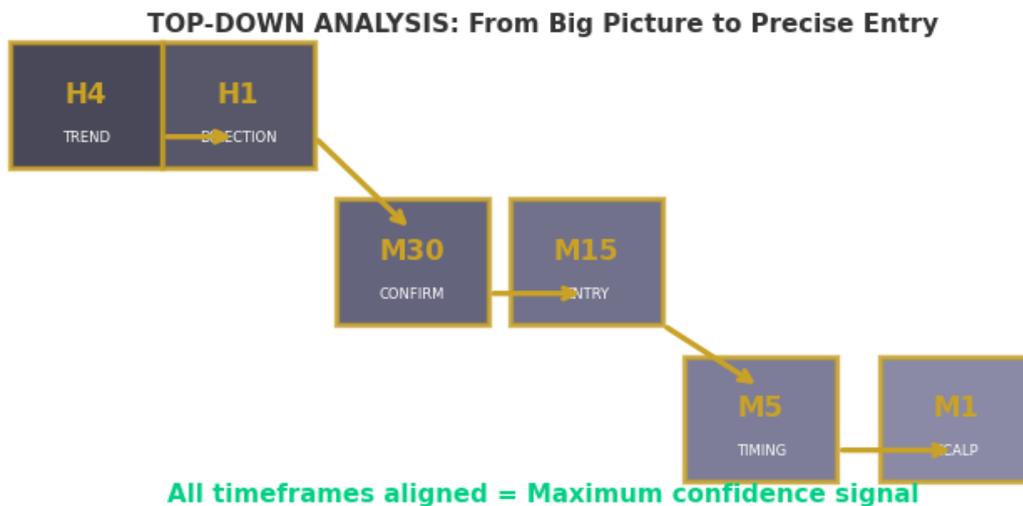

How Collective Learning Works:

- **Data Collection:** Every trade from every user feeds the cloud - entries, exits, profits, losses.
- **Pattern Recognition:** AI analyzes millions of data points to find what works in each condition.
- **Confidence Calibration:** Scores adjust based on REAL results from ALL users, not backtests.
- **Global Distribution:** Improved parameters push to ALL connected EAs - everyone benefits.
- **Zero Emotions:** AI never feels FOMO, fear, or greed. Pure mathematical decisions.

100 users x 5 trades/day = 500 learning samples daily = 15,000+ monthly!

Multi-Timeframe Trading Mastery

sTrades analyzes **all 6 timeframes** (M1, M5, M15, M30, H1, H4) simultaneously and correlates signals between them. This institutional approach ensures high-probability entries with controlled risk.

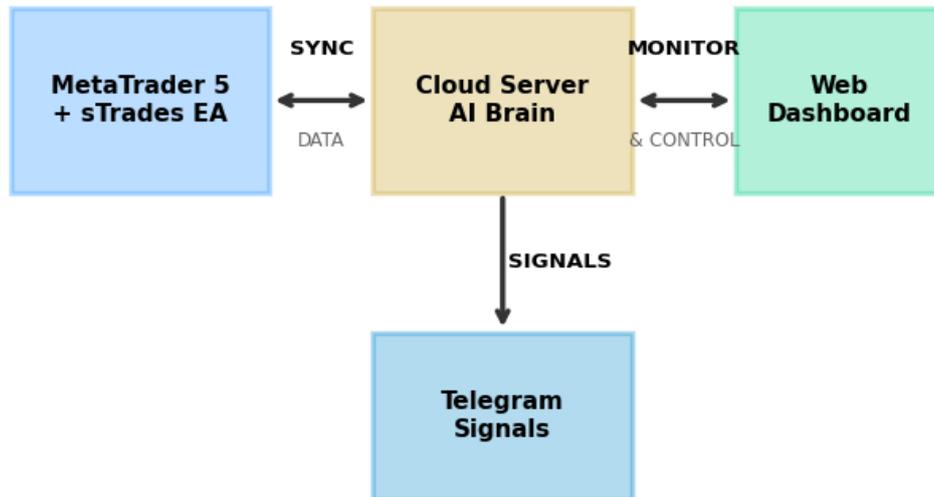

The Multi-Timeframe Advantage:

- **H4 - Big Picture:** Establishes dominant weekly/daily trend direction.
- **H1 - Direction:** Confirms intraday bias and major S/R levels.
- **M30 - Confirmation:** Validates the trading zone and setup.
- **M15 - Entry Zone:** Primary TF for high-probability signals.
- **M5 - Precision:** Fine-tunes entry for minimal drawdown.
- **M1 - Scalping:** Ultra-precise entries for aggressive strategies.
- **HTF Filter:** Lower TF trades blocked if against higher TF trend.
- **Multi-Strategy:** When 3+ strategies agree, extra confidence bonus.

Result: Fewer but higher-quality trades with superior risk-reward

Stay Connected: Dashboard & Telegram

Full control and monitoring from anywhere. Close positions remotely, disable trading instantly, receive signals for manual trading, and chat with other traders - all from your phone.

Telegram Signal Broadcasts

AI broadcasts high-confidence signals with everything for manual trading:

- **Entry Zone:** Exact price range (e.g., 2650.50 - 2651.20)
- **Stop Loss:** Pre-calculated protective level
- **Take Profit:** Multiple TP levels with partial close suggestions
- **Confidence:** AI confidence percentage

Dashboard - Full Remote Control

- **Live Monitoring:** Balance, equity, drawdown, P/L in real-time
- **Close Positions:** Close any or ALL positions instantly
- **Disable Trading:** Turn off auto-trading remotely
- **Remote Settings:** Change parameters from phone - syncs instantly
- **Trade History:** Complete log with strategy analysis
- **Analytics:** Equity curves, daily P/L, hourly heatmaps
- **AI Insights:** AI learning progress and suggestions
- **Community Chat:** Connect with other sTrades traders
- **PWA Support:** Install as mobile app

Our team monitors the system 24/7 for optimal performance.

Professional Risk Management

Capital preservation is our priority. Multi-level protection ensures your account survives drawdowns. The AI follows rules with 100% discipline - no emotional mistakes.

Multi-Level Drawdown Protection:

Level	Trigger	Action
Level 1	1.5% DD	Reduce lots by 25%
Level 2	2.5% DD	Reduce lots by 50%
Level 3	4.0% DD	Reduce lots by 75%
Stop	5.0% DD	No new trades

- **Daily Loss Limit:** Stops when daily loss exceeds threshold
- **Spread Filter:** Blocks entries during high spread
- **News Avoidance:** Pauses before/after major news
- **Kill Zones:** Focus on London/NY high-probability sessions

Subscription Plans

Plan	Duration	Price	Accounts
